ROYAL ASIATIC SOCIETY * LIBRARY * BOMBAY BRANCH OF THE

No. D/990 of 1916.

Poona, 27th April 1916.

From

THE SURGEON-GENERAL WITH THE
GOVERNMENT OF BOMBAY;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit, for the information of Government, the Annual Report on the Asylums for the treatment of Insanes in the Bombay Presidency for the year 1915.

Buildings and Repairs.

2. The annual repairs to the asylum buildings have been carried out by the Public Works Department and they are in good order.

3. At Dhárwár the male day barracks were paved with artificial stone and the windows in the female barracks were provided with bonnets to keep out the sun.

4. At Ahmedabad the sills of doors of the male and female wards were removed to enable better cleaning of the wards. The padded cell was dismantled owing to its moth-eaten condition and to its never having been required. The cell is now taken into ordinary use. The doors and windows of the cells recently built were provided with iron bars.

5. The Hyderabad Asylum has been enclosed by a new high boundary wall.

6. Owing to the present financial situation it has been found necessary to hold over for the present certain minor and major works at asylums, such as quarters at the Dhárwár Asylum for the Sub-Assistant Surgeons employed there. At the Central Asylum, Yerávda, the provision of padded rooms, central bath and improvements in the hospital of the asylum are required. The necessary plans and estimates are being prepared.

Water-supply.

7. The supply has been sufficient and good at all the asylums with the exception of that at Naupáda where the well is liable to contamination. This well which is used for drinking water is regularly permanganated and the pumping machinery has been removed to a distance so as to prevent surface contamination. The proposal to provide this asylum with a piped supply from the Tánsa Main is under consideration but has been postponed for the present owing to want of funds.

STATEMENT No. I.

Total Population.

8. The total population of the asylums was 1,652 as compared with 1,575 in 1914, an increase of 77. During the previous 5 years there was an average annual increase of 57 patients. The admissions and re-admissions numbered 420 males and 79 females against 404 males and 82 females admitted during the previous year.

Daily Average Strength.

9. The daily average strength was 1,194·0 (males 936·9 and females 257·1) as compared with 1,112·3 (males 876·1 and females 236·2) in 1914. The ratio between males and females remains fairly constant from year to year.

Discharges and Cures.

10. Of the total treated, 231 were cured against 220 in 1914, and 90 insanes were transferred to the care of friends against 93 in 1914. Of those transferred under this head, 62 had improved and 28 had not improved while under treatment.

11. Of the 14 insanes shown as discharged "otherwise," 5 were transferred to other asylums in the Presidency, 4 were sent back to the Military Department, 3 escaped, 1 was removed to the non-criminal list and 1 was transferred to a Leper Asylum.

Sickness.

12. The daily average sick in 1915 was 39·5 as compared with 30·4 in 1914. The increase was mainly due to a rise from 14·6 to 22·0 at the Central Lunatic Asylum, Yerávda, where all new admissions and cases under observation were treated as hospital cases, which has not been the practice heretofore. There was an increase in the prevalence of malarial fever at Naupáda, which was ascribed to the later rains. The general health of the insanes was on the whole satisfactory. There was no epidemic disease in any asylum.

Mortality.

13. The mortality was low as compared with the previous year. There were 85 deaths against 92 in 1914. The *ratio* of deaths to the daily average strength was 7·1 per cent. against 8·3 per cent. in 1914. Of the total number of deaths in the asylums, 16 or 18·82 per cent. were due to tuberculosis. There were only 9 deaths from diarrhœa and dysentery. There was a marked decrease in the prevalence of these diseases at Naupáda where there was only one death from dysentery during the year. This is attributed to the prophylactic measures adopted at the commencement of the rains and to the regular treatment of the drinking water with permanganate of potash. Of the 17 deaths which occurred at Ahmedabad four were among patients who were admitted in a very low condition and who lived only 2, 4, 12 and 17 days respectively after admission, and died from heart failure (2), tubercle of the lung (1) and debility (1). Of the remaining 13, six died from debility, four from diarrhœa and dysentery, one from pneumonia, one from asthma and 1 from ankylostomiasis. The causes of mortality at Hyderabad were chronic malarial cachexia (5), pneumonia (3), tuberculosis (3), epilepsy (2) and erysepelas, snake-bite, dysentery and suicide one each. Chronic malarial cachexia in insanes is commonly complicated by diarrhœa and is often fatal in persons already weakened by insanity. The mortality at the other asylums calls for no remarks.

STATEMENT No. II.

Criminal Insanes.

14. On 1st January 1915 the number of criminal insanes at the several asylums was 174. During the year 48 criminal insanes were admitted and two were re-admitted. The total population was 224 (207 males and 17 females) against 229 (214 males and 15 females) in 1914. The daily average strength was 172·3 as compared with 170·3 in 1914.

STATEMENT No. III.

Religion, Sex and Residence of the Insanes admitted.

15. Of the 490 insanes admitted during the year, there were 33 Europeans and Eurasians, 26 Indian Christians, 263 Hindus and 145 Mahomedans. Twenty-three belong to other races.

STATEMENT No. IV

Previous Occupations of the Insanes admitted.

16. Cultivators numbering 42 furnished the largest number of admissions. There were 38 domestic servants, 35 merchants and traders, 35 military sepoys and servants, 27 labourers, 24 mendicants, 23 clerks, 13 artisans and 99 of various occupations. In 86 cases the previous occupation could not be ascertained and 68 had no occupation.

STATEMENT No. V.

Ages of Insanes admitted.

17. Thirty-two insanes were under 20 years on admission, 384 were between 20 and 40 years, 70 were between 40 and 60 years and 4 were over 60 years of age.

STATEMENT No. VI.

Types of Insanity.

18. The principal types of insanity treated were idiocy 83 against 69 in the previous year, mania 817 against 791, melancholia 305 against 283, delusional insanity 99 against 86, insanity caused by *Cannabis Indica* or its preparations 51 against 42, and dementia 239 against 237.

STATEMENT No. VII.

Etiological Factors and associated Conditions in the Insanes admitted.

19. As predisposing or exciting causes the abuse of alcohol accounted for 22 cases against 28 in the previous year and indulgence in *gánja, charas* or *bhúng* for 61 cases against 46. The causes of insanity were not ascertained in 122 cases on account of insufficient previous history.

STATEMENT No. VIII.

Cash Accounts.

20. The total receipts and expenditure amounted to Rs. 3,38,924-2-9 as compared with Rs. 3,42,955-1-6 in 1914. The receipts from paying patients amounted to Rs. 36,762-2-5 against Rs. 33,323-12-3 received during the previous year, an increase of Rs. 3,438-6-2. The value of stores received from the Manufacturing Department, *less* cost of raw materials, was Rs. 5,409-9-10, showing a decrease of Rs. 148-5-8 over that of the preceding year. Deducting the receipts from paying patients, the value of stores received from the Manufacturing Department and the sums realized on account of the sale of goods to the public, etc., the net expenditure amounted to Rs. 2,42,132-12-3 as compared with Rs. 2,54,843-13-0 expended in 1914.

Amusements.

21. The expenditure incurred for recreation and amusements provided for the insanes was Rs. 2,815-9-0 as compared with Rs. 2,114-8-1 spent in 1914. During the year a sum of Rs. 2,000 was very generously presented to the Central Lunatic Asylum, Yerávda, by the Trustees of the estate of the late Mr. N. M. Wadia, C.I.E., for the purchase of a Billiard Table and for the construction of Tennis Courts. The amount expended out of this donation is included in the above figures.

STATEMENT No. X.

Receipts and Expenditure on account of Manufactures.

22. The total receipts from the Manufacturing Department amounted to Rs. 10,179-2-11 and the debits to Rs. 3,250-7-9, yielding a profit of

Rs. 6,928-11-2 as compared with Rs. 9,987-7-7 and Rs. 5,065-11-0 in 1914. The average number of insanes employed on manufactures was 1,194·0 against 1,112·1 in the preceding year.

Visitors.

23. The visitors were on the whole regular in their attendance.

Management.

24. The general management of the asylums has been satisfactory although carried out in many cases under considerable difficulty owing to the changes of *personnel* caused by the re-call of officers to military duty or to officers having to perform military duty in addition to their own.

I have the honour to be,

Sir,

Your most obedient servant,

R. W. S. LYONS, M.D.,

Surgeon-General, I. M. S.,

Surgeon-General with the

Government of Bombay.

The capacity of the Narotamdas Madhavdas Lunatic Asylum, Naupáda, is, at 140 superficial feet per paying patient, and at 80 superficial feet per pauper patient, for 198 males and 42 females; the maximum number of lunatics confined on any one night was 219 males and 45 females.

The capacity of the Ratnágiri Lunatic Asylum is, at 50 superficial feet per patient, for 125 males and 33 females; the maximum number of lunatics confined on any one night was 127 males and 35 females.

The capacity of the Central Lunatic Asylum, Yeravda, is, at 110 superficial feet per patient for 112 Europeans—77 males and 35 females and for 274 Indians—199 males and 75 females; the maximum number of European lunatics confined on any one night was 25 males and 19 females and that of Indian lunatics was 268 males and 102 females.

The capacity of the Dhárwár Lunatic Asylum is, at 80 superficial feet per patient, for 78 males and 30 females; the maximum number of lunatics confined on any one night was 77 males and 28 females.

The capacity of the Ahmedabad Lunatic Asylum is, at 64 superficial feet per patient, for 125 males and 31 females, the maximum number of lunatics confined on any one night was 130 males and 31 females.

The capacity of the Hyderabad Lunatic Asylum is, at 74 and 70 superficial feet per patient, for 159 males and 17 females respectively the maximum number of lunatics confined on any one night was 156 males and 18 females.

‡ Transferred to another asylum.

* Three transferred to another Asylum and one transferred from the criminal to non-criminal list.

§ One transferred to another Asylum, one escaped, one transferred to a Leper Asylum and four sent back to Military Department.

‖ Two escaped.

Note.—The figures shown in the statement include 9 cases under observation at the Central Lunatic Asylum, Yeravda.

* The figures opposite this heading differ from those shown in the last line of Statement No. VI of the Annual Report for 1914, as a large number of those then shown under Mania Melancholia, etc. have lapsed into Secondary Dementia and others. Their present condition is now more accurately described.

Annual Reports.—
Report on the Lunatic Asylums in the Bombay Presidency for the year 1915.

GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

Order no. 4206.

Bombay Castle, 19th June 1916.

Letter from the Surgeon General with the Government of Bombay, no. D.—1202, dated the 25th May 1916:—

"I have the honour to forward the Annual Report on the Lunatic Asylums of the Bombay Presidency for the year 1915 and to state, for the information of Government, that there is nothing in it, the immediate publication of which can be considered of doubtful expediency."

ORDER.—The report should be published.
